

Hello there, dear friend. So here we are, in our final blog post. Somewhat sad, isn't it? I mean, in the beginning, this was just a project that we had to do in the course of a lecture. Sure, we had something big in mind. Choosing sides against amazon, the biggest online shop in the world. But in these two semesters, not only did we become part of Betterzon, but Betterzon became a part of us. We hope that you followed along during our journey and that it has been just as interesting for you as it has been for us. The following paragraphs will summarize all important information about our project, hopefully helping future students to achieve great goals in their projects. See you in a better world - a world with Betterzon.
